

Rock Climbing Board Game

Name of Gym: Alpine Indoors

Name of Game: All-In Ascent

Welcome to the exhilarating world of indoor rock climbing, where your wit, agility, and grip strength shall be put to the test – as you conquer unique routes with challenging holds and volumes – as you scale to the top and reach your goal! Try, fail, strengthen, and persevere as you gain experience and strength with each climb, eventually conquering routes you once thought unachievable.

The game uniquely combines worker placement, Role Play Game (RPG), and chance mechanics in this strategic, thought provoking game.

Climber Information

Rock Climbers will each maintain a series of 4 primary statistics that will serve climbers as they tackle routes and gain experience. They included:

- Strength – power for overhangs, big moves, dynos
- Technique – efficiency, balance and footwork on the wall
- Focus – route reading
- Flexibility – reaching tricky holds and positions

Endurance - One mechanic of the game that players will also need to manage is endurance. Each character will have a specific number of endurance points available to them before needing to rest. Each climb will deplete endurance. If a climber does not have enough endurance to take a move, they must rest (which takes time units), this goes for both training and routes.

Rest

A climber, at any time, can take time to rest. After taking this action, and using up the corresponding time units, the climbers endurance goes back to maximum, allowing them to continue training. Players may take this action at any time (not limited to simply when all or nearly all of their endurance is depleted) and there are no limits to the number of players whom can take this action.

Climber Abilities

No climber is the same! Each climber card has a pre-set starting statistics across the four stats. Additionally, each climber will be imbued with a unique characteristic that gives them an edge over other climbers.

Character Name	Archetype	Description	Starting Strength	Starting Technique	Starting Focus	Starting Flexibility	Starting Exhaustion Max	Strength Growth Per Level	Technique Growth Per Level	Focus Growth Per Level	Flexibility Growth Per Level	Exhaustion Growth Per Level	Special Ability	Ability Description
The Powerhouse	Power Climber	A gym rat who focuses on raw pulling power and campus board training. Dominates overhang routes.	25	12	15	13	95	4.5	1.5	2	1.5	6	Muscle Memory	Once per round, re-roll any Strength check and take the better result
The Technician	Precision Specialist	A movement artist who reads sequences perfectly and wastes no energy on inefficient beta. Maintains perfect composure under pressure. Never lets fear dictate their climbing decisions.	12	26	18	14	100	1.5	4.5	2.5	2	5	Perfect Beta	Ignore one nerf dice penalty per climb (converts +1d6 to 0)
The Zen Master	Mental Warrior	Can reach holds others can't and squeeze into impossible positions with ease.	14	16	24	12	105	2	2.5	4.5	1.5	7	Unshakeable	Once per round, ignore all Focus requirements on a single climb attempt
The Contortionist	Flexibility Expert		13	15	14	24	90	1.5	2.5	2	4.5	4	Elastic Advantage	Once per round, treat any Flexibility requirement as 10 points lower
The All-Rounder	Balanced Climber	Jack of all trades who adapts to any climbing style with consistent performance.	18	18	18	18	100	3	3	3	3	5	Versatile	Once per round, redistribute up to 10 stat points between any two stats for a single climb
The Sprinter	Speed Climber	Climbs explosively with dynamic movements. Burns bright but fast.	22	14	12	16	85	4	2	1.5	2.5	3	Flash Speed	Reduce time cost of any climb by 2 units (minimum 1), but gain only half XP on success
The Iron Lung	Endurance Athlete	Built for the long haul with incredible	16	17	19	14	120	2.5	2.5	3	2	8	Endless Stamina	When resting, recover 50% more endurance

		stamina. Can climb all day without tiring.													than normal (rounded up)
The Boulderer	Problem Crusher	powerful sequences. Thrives on V-grade challenges.	23	16	14	12	90	4.5	2.5	2	1	Boulder Bias	On Bouldering climbs only: roll 3 dice instead of 2 and choose the best 2 results		
The Slab Dancer	Balance Master	Moves like water on vertical terrain. Trusts footwork over brute force.	11	23	20	16	100	1.5	4	3	2.5	6	Friction Trust	On Slab routes only: ignore one buff dice (converts -1d6 to 0) to gain +5 permanent to Technique checks	
The Route Reader	Problem Solver	Studies routes meticulously before attempting. Knowledge is power.	15	19	22	14	110	2	3.5	4	1.5	7	Preview Vision	Once per round, before attempting a climb, may look at all requirements and roll effects, then decide whether to attempt	

Each character's statistics follow the following stat progression

Character Name	Level	Strength	Technique	Focus	Flexibility	Exhaustion Max	Total Stats
The Powerhouse	1	25	12	15	13	95	65
The Powerhouse	2	30	14	17	15	101	75
The Powerhouse	3	34	15	19	16	107	84
The Powerhouse	4	39	17	21	18	113	95
The Powerhouse	5	43	18	23	19	119	103
The Powerhouse	6	48	20	25	21	125	114
The Powerhouse	7	52	21	27	22	131	122
The Powerhouse	8	57	23	29	24	137	133
The Powerhouse	9	61	24	31	25	143	141
The Powerhouse	10	66	26	33	27	149	152
The Powerhouse	11	70	27	35	28	155	160
The Powerhouse	12	75	29	37	30	161	171
The Powerhouse	13	79	30	39	31	167	179
The Powerhouse	14	84	32	41	33	173	190

The Route Reader	3	19	26	30	17	124	92
The Route Reader	4	21	30	34	19	131	104
The Route Reader	5	23	33	38	20	138	114
The Route Reader	6	25	37	42	22	145	126

The Route Reader	7	27	40	46	23	152	136
The Route Reader	8	29	44	50	25	159	148
The Route Reader	9	31	47	54	26	166	158
The Route Reader	10	33	51	58	28	173	170
The Route Reader	11	35	54	62	29	180	180
The Route Reader	12	37	58	66	31	187	192
The Route Reader	13	39	61	70	32	194	202
The Route Reader	14	41	65	74	34	201	214
The Route Reader	15	43	68	78	35	208	224

Each character gains experience from performing climbs. Once experience reaches maximum for that level, the character will level up and progress on their statistic track.

Level	XP Required Cumulative	XP Needed For Next Level	Notes
1	0	100	Starting level - all characters begin here
2	100	150	Beginning to develop skills
3	250	200	Basic competence achieved
4	450	250	Intermediate climber
5	700	300	Consistent performance
6	1000	350	Advanced techniques unlocked
7	1350	400	Experienced climber
8	1750	450	Expert level performance
9	2200	500	Elite climber emerging
10	2700	550	Master of fundamentals
11	3250	600	Professional level
12	3850	650	Competition ready
13	4500	700	Elite performer
14	5200	800	World class climber
15	6000	N/A	Maximum level achieved - legendary status

Turns

Each round will last a total of 10 time units. Players take turns moving their climber token around the board to different climbing areas or training materials, spending their turn on the task and depleting both endurance as well as time. Once all players have made their first move, the turn then proceeds to the player who has the most time left, until all time units have been depleted. When time has been depleted for all players, the round concludes and the route setting mechanic takes over.

For example, suppose there are three players: Brian, Zach, and Dan. Brian takes his first action which costs 3 time units (7 remaining), Zach 4 (6 remaining), and Dan 2 (8 remaining). Dan, would therefore, take two consecutive turns as he has the most time units remaining, followed by Brian and then Zach. Turn order continues to go towards the person with the most time units remaining until all can not take actions anymore.

Route Clearing Mechanic

A token shall be placed between two of the three climbing types and moves in a clockwise direction, starting between the bouldering wall and lead climb. After all climbers have exhausted their time points, take the “route clearing” interim action. Under this action, reset the route cards available on the climbing area next in the clockwise rotation and place new ones in their place, sending the discarded cards in the discard pile for that route. Subsequently, remove all climber tokens from the area and place them back with the player, thus resetting their turn. Move the tracker clockwise in between the next set of climbs.

The Rock Climbing Gym Setup

The Rock Climbing is segmented into three distinct climbing areas and four training zones along with a section to rest (as mentioned earlier in the ruleset).

On the game board, across the outer three sides of the board are the climbing areas including – bouldering wall, top rope, lead climb. At these sections, a set of 50 route cards will be placed. For the bouldering wall, three route cards will be shown face

up, lead climbing as one (see additional rules), and top roping starts with 0 (until players purchase belay devices). At the bottom is the Gear Shop which will hold the deck of gear cards. The game starts with three cards face up and will replenish after every purchase.

At the corners of the gym are the training areas, including grip board, campus board, continuous moon board, and balance/core. Only one player can attend each of these training areas at a time.

At the center remains a place to rest for players with no maximum or minimum capacity, meaning all players can be here at any point in the game.

Bouldering Wall

Bouldering entails climbing shorter, powerful climbs (called “problems”) on rock walls typically under 15ft without a rope, using crash pads and exit holds to exit the climb. Bouldering uses the V scale system for route ratings, broken down by:

VB–V0: Introductory, highly accessible for beginners

V1–V3: Learning/building fundamental skills; problems require more technique

V4–V6: Intermediate difficulty with more powerful movements and complex sequences **V7–V8:** Advanced movements requiring strength, precision, and technique

V9–V10: Expert-level difficulty

V11+: Elite climbing reserved for highly trained climbers

Unique Characteristic: Climbers attempting problems at the bouldering wall will experience climbs with more randomness. This will entail climbs with more than one rice role element compared to other types of climbs, adding more opportunities for buffs or nerfs to the climb. Furthermore, attending the climbing wall allows players to select *any* of the available routes on their turn displayed on the cards.

Bouldering stresses:

- Power
- Max strength
- Hard single sequences
- Coordination

Top Rope

Top Rope climbing involves climbing a larger wall while wearing a harness, attached to a rope anchored at the top and a climber or instructor belaying the climber from below.

Top-rope routes are graded on the **5.x scale** — everything from **5.0** (very easy) up through **5.15** (elite). The higher the number, the more technical and physically demanding the climb. The letter suffix (**a, b, c, d**) for grades **5.10 and above** fine-tunes the difficulty:

Beginner

5.1 – 5.4

- Straightforward climbing with big, obvious holds.
- Suitable for brand-new climbers.

5.5 – 5.8

- Still beginner-friendly but requiring more balance, footwork, and route reading.
- Small footholds and slightly more vertical terrain.

Intermediate

5.9 – 5.10

- Steeper, more technical, possible small overhangs.
- Requires specific techniques and better strength.

Advanced

5.11 – 5.12

- Technical, often powerful, with smaller holds and sustained sequences.
- Climbers usually train consistently to climb at this level.

Expert

5.13 – 5.15

- Very difficult, with extremely small holds, overhangs, and intense movement.
- Only highly trained or professional climbers operate here.

Unique Characteristics: Climbers seeking to top rope have limited options compared to other forms of climbing. At the Top Roping wall, climbers start with a limited number of belayers, with options to unlock more throughout the game. The game starts with one belayer, adding a second one after 5 rounds and a third after 12. Furthermore, once climbers select a belayer, they are limited to the routes assigned to that belayer, so climbers must be diligent on when to attend and how long to stay.

Lead climbing

Lead climbing involves climbers who self-belay, requiring climbers to clip the rope into quickdraws on the way up, so although the **difficulty grade is the same as top-rope**, the *experience* often feels harder due to endurance demands, fall potential, and mental factors.

Unique Characteristics: Climbers who chose to Lead climb must purchase the necessary equipment to be able to climb, such as carabiners and rope. This climbs take significantly more endurance than both lead climbing and bouldering but will yield the highest experience per climb, making this route sought after.

Training Materials

For many climbers, training occurs off the wall to boost physique. The Rock Gym offers four unique spots for training, providing the climber with targeted stat upgrades. The available options included:

1. Grip Board / Fingerboard - Increases focus by +5
2. Campus Board – Increases strength by +5
3. Continuous MoonBoard – Increases Technique by +5
4. Balance and Core - Increases Flexibility by +5 points

Players who attend these areas will gain a chip marking their increase in statistics.

The Store

Climbers may also purchase materials and skills directly from the Climbing Store. Gear and skills, once purchased, can be equipped to the climber for permanent use with the game. Purchasing from the store, however, comes at a cost – experience points, so chose wisely. Characteristics of purchasing from the store: Access to the store will always take 1 time unit. Players may purchase from the Store only one time per round. Experience points are spent as currency in this game (everything is an opportunity cost). Climbers may not decrease in level and must have experience points available within that level to purchase the skill or item.

Cards available include:

Item Name	Category	XP Cost	Stat Effect	Special Effect	Description
Climbing Shoes	Essential Safety Gear	75	-3 Technique on all climbs, -2 Flexibility on Slab climbs	Improves foothold precision	Provides precise foothold control with sticky rubber and snug fit; better grip on small holds
Chalk	Performance Gear	50	-2 Strength on climbs with Crimp or Sloper holds	Maintains friction on sweaty hands	Absorbs sweat from hands to maintain friction; stronger grip and less slipping
Chalk Bag	Performance Gear	60	-2 Strength on all climbs	Allows chalk access without leaving wall	Holds chalk for easy access mid-climb; keeps hands dry without leaving the wall
Harness	Essential Safety Gear	95	-3 to all stats on Top Rope and Lead climbs	Required for rope climbing	Secures climber to rope system and distributes weight safely during falls

Belay Device	Essential Safety Gear	80	-2 Focus on Lead climbs	Safer belaying and catching	Adds friction so belayer can control rope during belaying
Locking Carabiner	Essential Safety Gear	90	None	Unlocks advanced rope climbing features	Connects belay device to harness and locks to prevent accidental opening
Non-Locking Carabiner	Convenience Gear	35	None	Allows carrying extra chalk bag or accessories	Quick clipping of accessories like chalk bags or small tools
Lead Rope	Essential Safety Gear	120	-3 Strength on Lead climbs only	Required for lead climbing	Dynamic rope absorbs fall energy for safe catches on lead routes
Helmet	Safety Gear	65	None	+5 max Exhaustion (reduces injury risk)	Protects head from falling objects or wall impacts
Finger Tape	Performance Gear	85	-4 Strength on Crimp-heavy climbs	Prevents finger injuries	Wraps fingers to protect skin and support tendons
Liquid Chalk	Performance Gear	95	-3 Strength on all climbs, stacks with regular Chalk	Long-lasting friction, cleaner than powder	Provides alcohol-based chalk layer with minimal dust
Knee Pads	Specialized Gear	110	-5 to all stats on climbs with Roof features	Enables knee bar rest positions	Adds friction and padding for knee bar techniques
Climbing Brush	Convenience Gear	55	None	Restore 1d6 Exhaustion once per round when used	Cleans holds of chalk buildup and rubber residue
Comfortable Climbing Apparel	Comfort Gear	90	-1 to all stats, +10 max Exhaustion	Improved movement and breathability	Allows full range of motion and breathability
Water Bottle	Comfort Gear	40	None	When resting, recover +3 additional Exhaustion	Keeps climber hydrated during long sessions
Energy Snacks	Consumable Gear	45	None	Once per round, recover 2d6 Exhaustion without using rest action	Provides quick fuel during long gym sessions
Gear Bag	Convenience Gear	70	None	Reduces Store access time from 1 to 0 time units	Carries all climbing gear in an organized way
Grip Strength Trainer	Training Equipment	180	+2 permanent Strength +3 permanent Strength, +2 permanent Technique	Gradual strength building	Strengthens fingers and forearms through regular training
Portable Hangboard	Training Equipment	280	+2 permanent Strength	Advanced finger strength training	Training tool for finger strength to build power for harder routes
Resistance Bands	Training Equipment	150	+2 permanent Flexibility	Mobility and warm-up tool	Used for warm-ups and shoulder stabilization
Foam Roller	Recovery Gear	120	None	When resting, recover +5 additional Exhaustion	Helps in muscle recovery and tension release
Belay Gloves	Safety Gear	95	-2 Focus on Lead climbs -2 to all stats on	Prevents rope burn	Protects hands when managing rope friction
Crash Pad	Safety Gear	130	Bouldering climbs only	Safer bouldering landing	Provides cushioned landing for bouldering falls
Quickdraws Set	Performance Gear	140	-4 Focus on Lead climbs	Faster clipping during lead	Set of quickdraws for efficient lead climbing
Approach Shoes	Comfort Gear	55	None	-1 time unit cost when moving to any climbing area	Comfortable shoes for walking around the gym

Climbing Notebook	Strategy Gear	100	None	Once per round, may re-attempt a failed climb at half time and Exhaustion cost	Records beta and progress for route memory
Pre-Workout Supplement	Consumable Gear	80	+3 to all stats for next climb only	One-time energy boost	Provides temporary performance enhancement
Protein Shake	Consumable Gear	60	None	Gain +50% XP from next successful climb	Aids in recovery and muscle building
Athletic Tape	Performance Gear	50	-2 Flexibility requirements	Joint support and stability	Supports joints and prevents minor injuries
Climbing Guidebook	Strategy Gear	175	None	Reveal all route cards in one area before choosing which to attempt	Study route information and grades
Wireless Speaker	Motivation Gear	65	None	Once per round, gain +2 to any one stat for a single climb	Music for motivation and focus
Yoga Mat	Training Equipment Strategy	95	+1 permanent Flexibility	Flexibility and recovery training	Used for stretching and mobility work
Stopwatch	Gear	50	None	Gain +1 time unit once per round	Helps plan time management strategy
Climbing Magazine	Inspiration	35	None	Gain +25 XP immediately upon purchase	Inspiration and technique tips
Private Coaching Session	Training Service	340	+2 permanent to any one stat of choice	One-time professional instruction	Expert technique analysis and improvement
Gym Membership Upgrade	Facility Access	440	None	Unlock bonus training area: +5 to all stats on first climb each round	Premium facilities and training zones
Competition Entry Fee	Special Event	280	+2 permanent Focus	Win or lose, gain +200 XP and test skills in competition	Test skills in competitive environment
Video Analysis Session	Training Service	240	+3 permanent Focus	Professional movement review	Film and analyze your climbing for improvements
Nutrition Consultation	Training Service	190	+10 permanent max Exhaustion	Optimized diet for performance	Learn proper fueling for climbing performance
Physical Therapy Session	Recovery Service	270	None	Immediately remove any accumulated injuries or penalties	Professional recovery and injury prevention
Custom Route Setting	Special Service	450	None	Create one custom route card at your preferred difficulty	Personalized challenge designed for you

Route Cards

Climbers may attempt any route they desire, regardless of difficulty. In order to complete a climb, player's character must have statistics at or above the ones shown on the card for each attribute. The players statistics are augmented by both equipment/gear cards they have attached to their player as well as any roles that grant higher statistics, which they roll when attempting the climb. Players who succeed on the climb gain experience points corresponding with success while they gain the experience points attributed to failure should they fail the route. After the route has been taken, deduct the amount of time available to that player as well as endurance points, all shown on the route card, on the player board. Should a player not have any time and/or endurance left, they may not complete the climb.

The route cards included are:

Area	Name	Description	Grade	Strength Required	Technique Required	Focus Re
Bouldering	Beginner's Fortune	A welcoming slab with positive jugs to build confidence	V0	15	20	
Bouldering	Easy Street	Straightforward holds and comfortable angles for newcomers	V0	18	18	
Bouldering	Warm-Up Wonder	Perfect for loosening up before harder sends	V1	22	25	
Bouldering	The Friendly Giant	Large holds on a gentle overhang	V1	25	22	
Bouldering	Jug Haul	Big holds test basic pulling power	V1	28	24	
Bouldering	Crimson Ladder	Sequential crimps up a vertical wall	V2	30	28	
Bouldering	Balancing Act	Requires steady footwork and body positioning	V2	28	32	
Bouldering	The Pinch Problem	Tests thumb strength on compression holds	V2	35	30	
Bouldering	Toe Hook Traverse	Lateral movement with crucial heel and toe hooks	V3	32	35	
Bouldering	Power Pocket	Dynamic moves between deep two-finger pockets	V3	40	32	
Bouldering	Slopey Situation	Frustrating slopes demand perfect weight distribution	V3	38	36	
Bouldering	The Gaston Gateway	Wide stance requiring opposing pressure moves	V3	42	34	
Bouldering	Crimper's Delight	Tiny edges reward precise finger positioning	V4	45	40	
Bouldering	Roof Raider	Inverted climbing tests core and shoulder strength	V4	48	38	
Bouldering	Technical Marvel	Complex beta requires careful route reading	V4	40	45	
Bouldering	The Mantle Challenge	Awkward topout demands precise weight shifts	V4	44	42	
Bouldering	Compression Test	Squeezes body between volumes and wall	V4	50	40	

Bouldering	Dyno Dilemma	Requires explosive jump to distant hold	V5	52	38
Bouldering	Crimp or Crumble	Unforgiving micro crimps on steep terrain	V5	48	46
Bouldering	The Slab Enigma	Delicate smearing and balance on nearly featureless rock	V5	35	52
Bouldering	Volume Voyage	Navigate bulbous volumes with creative movement	V5	46	48
Bouldering	Undercling Alley	Sustained underclings drain forearms quickly	V5	54	44
Bouldering	Heel Hook Heaven	Multiple heel hooks required for efficiency	V6	48	50
Bouldering	The Pinch Fest	Relentless pinches with no rest positions	V6	56	46
Bouldering	Coordination Crisis	Strange body positions test spatial awareness	V6	50	48
Bouldering	Crimp City	Extended sequence of razor-sharp crimps	V6	52	52
Bouldering	The Roof of Doom	Long overhang requires sustained power	V7	58	48
Bouldering	Sloper Nightmare	Massive slopers with desperate slaps	V7	55	54
Bouldering	Micro Beta	Subtle movements make or break the ascent	V7	50	56
Bouldering	The Bicep Burner	Lock-offs and pulls without foot relief	V7	62	50
Bouldering	Shoulder Shredder	Campus-style moves destroy upper body	V8	65	48
Bouldering	Technical Nightmare	Obscure beta hidden in plain sight	V8	54	60
Bouldering	The Knee Bar Crux	Rest position exists but hard to find	V8	58	56
Bouldering	Compression Beast	Full-body squeeze through entire problem	V8	68	54
Bouldering	Dyno Chain	Multiple dynamic moves in succession	V9	70	52
Bouldering	The Crimp Destroyer	Tendon-testing crimps on extreme overhang	V9	64	58
Bouldering	Slab of Insanity	Psychological crux on vertical nothingness	V9	45	68
Bouldering	The Power Roof	Raw strength demanded for multiple moves	V9	75	56
Bouldering	Precision Impossible	Millimeter accuracy required on every move	V10	58	70
Bouldering	The Full Monty	Tests every skill simultaneously	V10	68	65
Bouldering	Shoulder Breaker	Unnatural positions strain joints	V10	72	62
Bouldering	Elite Compression	Only the strongest can squeeze through	V10	78	60
Bouldering	The Impossible Pinch	Legendary pinch few can close	V11	80	64
Bouldering	Crimp Hell	Pushes finger strength beyond limits	V11	75	68
Bouldering	Project Zero	The gym's hardest problem awaits a first ascent	V12	82	72
Bouldering	The Gauntlet	Combines every challenge into one masterpiece	V12	85	75
Bouldering	Campus Chaos	No feet allowed on this power endurance test	V13	88	70
Bouldering	The Final Boss	Reserved for only the most elite boulderers	V13	90	78

Bouldering	Apex Predator	The ultimate test of bouldering mastery	V14	95	80
Bouldering	Legendary Send	Whispered about but rarely completed	V15	98	85
Top Rope	First Timer's Friend	Gentle introduction to rope climbing with large holds	5.6	20	18
Top Rope	Vertical Avenue	Straight up with positive holds throughout	5.6	22	20
Top Rope	The Easy Column	Build endurance on this beginner-friendly route	5.7	25	24
Top Rope	Jug Journey	Follow the jugs to the anchors	5.7	28	26
Top Rope	Learning Curve	Introduces basic climbing movements safely	5.8	30	28
Top Rope	Ledge to Ledge	Rest positions available between sections	5.8	32	30
Top Rope	The Beginner's Overhang	Slight angle increase with good holds	5.8	35	32
Top Rope	Footwork Focus	Teaches importance of precise foot placement	5.9	34	36
Top Rope	The Standard	Classic moderate climb everyone should try	5.9	38	34
Top Rope	Reach for the Sky	Extended moves test wingspan	5.9	36	32
Top Rope	Crimson Wall	Vertical wall with smaller holds appears	5.10a	40	38
Top Rope	Balance Beam	Narrow features demand careful positioning	5.10a	38	42
Top Rope	The Crack Intro	Basic crack technique on moderate angle	5.10a	42	40
Top Rope	Overhang Initiation	First real roof climbing experience	5.10b	45	38
Top Rope	Endurance Builder	Pumpy climb with few rest opportunities	5.10b	48	42
Top Rope	Technical Terrain	Requires thinking through each section	5.10c	44	46
Top Rope	The Pinch Route	Introduces pinch grips on vertical wall	5.10c	46	44
Top Rope	Crimp Central	Small edges test finger strength	5.10d	50	46
Top Rope	Steep Learning	Overhanging wall with thoughtful sequences	5.10d	52	44
Top Rope	The Gaston Section	Side pulls and opposition moves featured	5.11a	48	50
Top Rope	Sloper City	Frustrating slopes at moderate height	5.11a	50	48
Top Rope	Heel Hook Required	Learn advanced foot techniques here	5.11a	46	52
Top Rope	Power Climb	Upper body strength gets you through	5.11b	56	48
Top Rope	The Crux Wall	Distinct difficulty spike mid-route	5.11b	54	50
Top Rope	Sustained Difficulty	No easy sections on this pumpy line	5.11c	58	52
Top Rope	Technical Overhang	Steep angle demands perfect technique	5.11c	52	56
Top Rope	The Roof Problem	Navigate through horizontal section	5.11d	60	54
Top Rope	Crimp Fest Supreme	Extended crimp sequence to the top	5.11d	56	58
Top Rope	Dynamic Moves	Several long reaches between holds	5.12a	62	56

Top Rope	The Compression Line	Body tension crucial throughout	5.12a	64	58
Top Rope	Advanced Technique	Obscure moves separate contenders	5.12b	58	62
Top Rope	The Power Endurance	Strength needed for entire ascent	5.12b	68	60
Top Rope	Flexibility Test	High steps and wide reaches abound	5.12c	60	58
Top Rope	The Steep One	Overhanging wall tests everything	5.12c	70	62
Top Rope	Micro Hold Heaven	Tiny holds require precision	5.12d	66	66
Top Rope	The Upper Echelon	Elite level climbing begins here	5.13a	72	68
Top Rope	Body Tension Master	Core strength absolutely essential	5.13a	74	70
Top Rope	The Crimpfest Ultimate	Unrelenting crimps to the anchors	5.13b	70	72
Top Rope	Overhang Extreme	Sustained steep climbing at its finest	5.13b	78	70
Top Rope	Professional Grade	Requires years of training	5.13c	80	74
Top Rope	The Competition Route	Used for advanced climbing competitions	5.13d	82	76
Top Rope	Elite Territory	Few can complete this masterpiece	5.14a	85	78
Top Rope	The Redpoint Project	Pushing the limits of indoor climbing	5.14b	88	80
Top Rope	World Class	Matches outdoor world-class routes	5.14c	90	82
Top Rope	The Impossible Dream	Only the absolute best succeed	5.14d	95	85
Top Rope	Legendary Ascent	The hardest top rope in the gym	5.15a	98	88
Lead Climbing	Lead Introduction	Perfect first lead with good clipping positions	5.8	30	28
Lead Climbing	Confidence Builder	Builds trust in lead climbing systems	5.8	32	30
Lead Climbing	The Easy Lead	Straightforward clipping with large holds	5.9	35	32
Lead Climbing	Clip and Climb	Learn clipping rhythm on this friendly route	5.9	38	34
Lead Climbing	First Overhang Lead	Introduces lead climbing on angles	5.10a	42	38
Lead Climbing	The Clipping Challenge	Awkward clip positions test efficiency	5.10a	40	42
Lead Climbing	Pump Management	Learn to pace yourself while leading	5.10b	45	44
Lead Climbing	Mental Game	Overcoming fear is half the battle	5.10b	44	40
Lead Climbing	The Long Route	Extended length demands stamina	5.10c	48	46
Lead Climbing	Clip Rest Clip	Finding rest positions crucial	5.10c	46	48
Lead Climbing	Power Lead	Strength needed between bolts	5.10d	52	48
Lead Climbing	Technical Leading	Complex moves while managing rope	5.10d	50	52
Lead Climbing	The Steep Lead	Overhanging terrain with good clips	5.11a	54	50
Lead Climbing	Crimper's Lead Route	Small holds between bolt positions	5.11a	52	54

Lead Climbing	Runout Section	Longer distance between some clips	5.11b	56	52
Lead Climbing	The Exposure Line	Mental fortitude tested at height	5.11b	54	56
Lead Climbing	Overhang Lead Challenge	Steep wall demands efficient clipping	5.11c	60	56
Lead Climbing	Pump Factory	Forearm endurance critical	5.11c	62	58
Lead Climbing	The Crux Clip	Most difficult move right at bolt	5.11d	58	60
Lead Climbing	Sustained Lead	Difficult climbing without respite	5.11d	64	62
Lead Climbing	Advanced Clipping	Unusual positions for clipping bolts	5.12a	66	64
Lead Climbing	The Power Lead Wall	Raw strength between each clip	5.12a	70	62
Lead Climbing	Technical Mastery Lead	Every move demands precision	5.12b	64	68
Lead Climbing	The Compression Lead	Body tension while managing rope	5.12b	72	66
Lead Climbing	Crimp Lead Challenge	Extended crimping while leading	5.12c	68	70
Lead Climbing	The Steep Project	Overhanging lead climb paradise	5.12c	75	68
Lead Climbing	Endurance Lead	Tests stamina over length and difficulty	5.12d	72	72
Lead Climbing	Mental Fortress	Psychological challenges throughout	5.12d	70	70
Lead Climbing	The Elite Lead	Where advanced climbers prove themselves	5.13a	76	74
Lead Climbing	Crimp Lead Extreme	Finger strength while clipping under stress	5.13a	74	76
Lead Climbing	Overhang Lead Master	Sustained steep climbing while leading	5.13b	80	74
Lead Climbing	The Power Endurance Lead	Strength and stamina combined	5.13b	82	76
Lead Climbing	Professional Lead Route	Competition-level difficulty	5.13c	78	80
Lead Climbing	Technical Lead Masterpiece	Intricate sequences while managing gear	5.13c	76	82
Lead Climbing	The Ultimate Lead Challenge	Tests every aspect of lead climbing	5.13d	84	80
Lead Climbing	Elite Competition Lead	Used in professional competitions	5.13d	86	82
Lead Climbing	World Class Leading	Among the hardest leads in any gym	5.14a	88	84
Lead Climbing	The Redpoint Lead	Requires multiple attempts to learn	5.14a	85	86
Lead Climbing	Master Class Lead	Reserved for master climbers	5.14b	90	86
Lead Climbing	The Impossible Lead	Few have completed this route	5.14c	92	88
Lead Climbing	Legendary Lead Line	The stuff of climbing legends	5.14d	95	90
Lead Climbing	Project Infinity	The gym's ultimate lead challenge	5.15a	98	92
Lead Climbing	The Final Ascent	The hardest lead route ever set here	5.15b	100	95
